ANTIQUE RADIO CLASSIFIED

VOLUME 13 JULY 1996 NUMBER 7

A.R.C. — THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS OF OLD RADIOS AND RELATED ITEMS — PUBLISHED MONTHLY

ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, One River Road, P.O. Box 2, Carlisle, MA 01741. Second-class postage paid at Carlisle, MA, and additional mailing offices. Telephone: (508) 371-0512, 8:30 AM to 6:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are $36.95 by Second Class mail and $53.95 by First Class mail.

Annual foreign rates. By air: Canada - $58.00; Mexico - $64.00; Other foreign countries - $100.00. Surface mail: Canada - $47.00; Other foreign countries - $52.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.

Printed in U.S.A.

STAFF:

Publisher and Editor: John V. Terrey
Production Manager: Scott J. Young
Office Manager: Lisa A. Friedrichs
Advertising Manager: Cindie P. Bryan
Managing Editor: Dorothy Schecter
Radio Events Editor: Chris Frederickson
Publishing & Editorial Staff: Ray Bintliff, Dave Crocker, Dick Desjarlais, Bobby Lyman, Jean Meldonian
Founding Publisher/Editor: Gary B. Schneider
Contributing Writers: Mike Adams, Richard L. Arnold, Ray Bintliff, Ron Boucher, Paul J. Bourbin, Norman S. Braithwaite, Dave Crocker, Alan S. Douglas, Richard C. Foster, Fred Geer, Jim Kreuzer, Ron Ramirez, Henry Rogers, Ian L. Sanders, Gary B. Schneider, Daniel Schoo, Dwane Stevens, Frank R. White, Ralph Williams

PURPOSE. Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

CONTACTING ANTIQUE RADIO CLASSIFIED. All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.
Only UPS, Federal, etc. items to street address: One River Road.
Telephone: (508) 371-0512; Fax: (508) 371-7129
E-mail: ARCMagzine@aol.com — Web: www.antiqueradio.com
Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. A.R.C. assumes that permission is given to edit and to publish all correspondence and articles received unless otherwise indicated.

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard ($10.00 min.) are preferred. Make check out to "A.R.C." U.S. stamps or cash are OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over $10. If under $10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request. Unless prior arrangements are made, all submitted materials may be edited, become the property of **Antique Radio Classified** and will not be returned. Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First or Second Class mail (Second Class is the way most magazines are mailed). The mailing of First Class copies is staggered over one to four days with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Second Class copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Second Class mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS – DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Since artwork is reduced to 63% in the printing process, **originals must be the artwork size listed below.** Do not send in artwork on art board or send negatives. Ads should be typeset or typed neatly with a carbon ribbon, black ink (not pencil) on white. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Photos should be at an 85-line screen; otherwise, add $14.00 per photo for screening. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

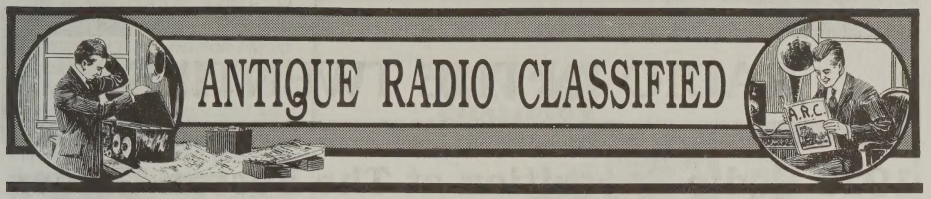
† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.



EDITOR'S COMMENTS

To New Englanders whose memories span the last half century or more, the words "Boston" and "Garden" are synonymous. Certainly, there are few who have lived their lives here who did not attend at least one event in that nostalgic arena — if not a Celtics or Bruins game or the Ice Capades, then a concert or a university commencement. Our lead article on the 1929 Boston Radio Exposition by Dick Desjarlais reminds us that radios in the 1920s could pack 'em in as well as any rock star does today. The demise of Boston's "Garden" is a little like the passing of a family's big Philco floor model — gone but never forgotten.

In another article mindful of how times have changed, Dwane Stevens explains how straight-line capacity, wavelength and frequency tuning is achieved in early battery sets. Ray Bintliff adds more details on the subject from A.R.C.'s library. The simplicity of tuning in a station on today's radios with their digital readouts helps us to forget how difficult it was to tune those old radios.

A radio built into a drawer is an unusual find. Joseph Wood describes such a radio — the Magnavox Model T — picked up at a garage sale. Seriously in need of repair, it is the subject of his well documented restoration article.

Chet Wisner contributes to *Radio Ramblings* this month with his fascinating story of a radio that he serviced in 1946. Chet's professional radio days go back to World War II. His long lists of radios and parts, which he offered for sale for many years, are remembered by collectors everywhere.

David Davies picks up on the observations of Geoff Shearer in his article "The Radio Collector — in Four Stages" (February 1995, page 16). David describes a fifth stage — the "boy radio bug" — who today collects what he remembers from his boyhood years.

Three auctions are reported this month. The Harris Auction Center's sixth annual radio auction featured a Zenith Windcharger, which sold for $400, as well as the usual assortment of radios. A 26-tube Scott radio was the top item, bringing $1,450. The Vintage Radio & Phonograph Society's Annual Spring Auction hit a record total high of over $22,000, more than three times last year's total. Phonographs are often seen at this auction, and an Edison Amberola 30 with six cylinders brought $410.

The Whalen Auction Service's auction on May 17 attracted about 50 bidders. Among the battery sets, cathedrals, Bakelites and consoles, an ornate Zenith brought the top bid of $875.

Photo Review this month is an international gallery with sets from Canada, Japan and Germany, as well as the U. S. *Radio Miscellanea* includes a letter about a unique "radio" wedding, along with several letters from readers commenting about how A.R.C. works for them.

A.R.C. on the Web. If you are on-line, why not consider a visit to our informative site at http://www.antiqueradio.com/ on the World Wide Web? Although we do not make ads available there, we do post selections from each issue including the *Coming Radio Events* calendar, listing of clubs, book reviews, a feature article, editor's page, and *Radio Miscellanea.* We now have links to over 70 vintage radio sites. You might also consider using our interactive order form on the site for ordering and renewing subscriptions, and for ordering books and videos.

Late Ads. Several times a year I feel compelled to remind everyone that our classified ad deadline is noon, Eastern Time, on the tenth of the month. Since the typing of ads for the issue is complete soon after the noon deadline, we cannot take any more ads for the current issue without compromising our printing and mailing schedule. This month, 37 ads arrived on the 11th, many more than usual. Many of the ads had been mailed over a week earlier, but it can take a week or more for your ads to get here. Please mail them about the first of the month (even if you have not received your previous month's issue by then). This will *almost* insure that we receive them on time.

Ads also can be submitted by fax, overnight mail (FedEx, Express Mail, etc.) and by e-mail, but remember we still need them by noon, Eastern Time, on the tenth.

Coming Radio Events. The major July event is Extravaganza '96 in Lansing, Michigan! Grebe is the theme this year. In addition to the usual flea market, contest, and programs typical of major meets, this 3-day show has a fun social hour for all on Saturday night at no extra charge.

And block out the weeks before and after Labor day for the largest two U.S. shows — Radiofest 1996 and the Antique Wireless Association Annual Conference. Full page ads for both of these events are in this issue. I hope to see many of you at one of these great events.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Dick Desjarlais' lead article about the 1929 Boston Radio Exposition was inspired by his discovery of a program for that event. The program cover, in turn, inspired our July cover. Many of the buildings depicted in this interesting collage are among the most famous Boston landmarks — Faneuil Hall, the State House, the Custom House, etc. Center is the Garden itself, decorated with a radio antenna by an obviously inspired illustrator.

1929 Radio Exposition at The Boston Garden

BY DICK DESJARLAIS

WHICH RCA RADIOLA FOR YOU?
10 MODELS $54 TO $690
Small? Large? Radio only? Or with phonograph?
The RCA Radiola line is most complete. A price and model to meet every desire.
And vastly refined — all the latest and most advanced improvements.
Hear these wonderful new RCA Radiolas at your nearest Authorized RCA Radiola Dealer TODAY.
MODEL NO. 46
PRICE $179 (less Radiotrons)
MODEL NO. 33
PRICE $54 (less Radiotrons)
RCA Loudspeaker 100B-$17.50
MODEL NO. 44
PRICE $110 (less Radiotrons)
RCA Loudspeaker 103-$22.50
Radiola Division
Radio-victor Corporation of America

Figure 1. Note the price range in this 1929 RCA Radiola ad from the "9th Annual Boston Radio Exposition Show Program and Feature Book."

At a flea market within the last year, Dick Desjarlais found a program of the Boston Radio Exposition, which was held at the famed Boston Garden, October 7-12, 1929. This find was a timely coincidence because in the fall of 1995, the doors of Boston's beloved arena closed for the last time. The program summarized here reopens those doors, if only for a moment, to recapture radio's "Golden Age." (Editor)

From its opening in 1928, the Boston Garden hosted thousands of attractions, including a myriad of amateur and professional sports events, the circus, appearances of heads of state, university commencements, evangelical revivals, and concerts, just to name a few. All this came to an end in the fall of 1995, when the new Fleet Center opened and the famous "Garden," center of almost 70 years of Boston memories, closed forever.

What is not commonly known is that in October 1929, the 9th annual Boston Radio Exposition made its first appearance in the "Boston Garden Exposition Hall."

As noted in the program, which gives a brief history of the Boston Radio Show: "During the nine Radio Expositions held in

Figure 4. The Hotel Arlington advertised everything but the most important asset — radios in every room — and could hardly have competed with the Statler.

banks and department stores, among others — placed their ads in what the sponsors of the Exposition called their "Show Program and Feature Book."

Figure 3 shows a "Hotels Statler" ad boasting a "Radio in Every Room." The Hotel Arlington ad, shown in Figure 4, offered a single room for as low as $2.50 and a blueplate dinner for $1.00.

The main daily events for this 6-day exposition included television demonstrations, musical programs received on the Kylectron, musical program demonstrations on Victor auditorium speakers, and theremin demonstrations.

The program also lists several live musical events, including the Amrad Concert Orchestra and Joe Rines and his Triadors, whose ad is shown in Figure 5. For convention goers following the 1929 World Series, a play-by-play coverage was provided by direct wire. Those with other interests could attend the presentation of Miss Majestic, or listen to a radio address by Massachusetts Governor Frank G. Allen.

All in all, the opportunity to see so many 1929 state-of-the-art radios under one roof makes me wish for a time machine to revisit the Boston Garden when the "Golden Age of Radio" was in the making. But this nostalgia-filled *9th Annual Boston Radio Exposition Show Program and Feature Book* will suffice as a reminder of the way it was.

(Dick Desjarlais, Box 629, Littleton, MA 01460)

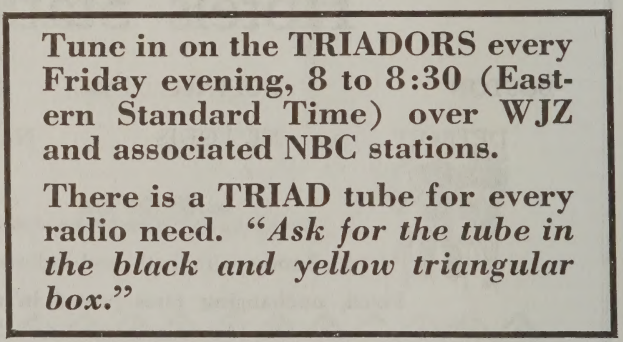
Dick Desjarlais is an A.R.C. staff member. His interest in radio began at age 14 when he was an apprentice in a radio repair shop. This interest renewed itself when he retired from public school administration. Since 1987, he has been an active collector and dealer.

(Radio Exposition, continued)

Boston, the growth of radio, from the crystal set to the complete all-electric receiver with the latest type of speaker capable of reproducing the true tones of the broadcasts, has been exhibited. This year the very latest products of the important radio factories of the country are displayed in more than 200 booths. In addition to being the oldest commercial radio show in the world, this year's exhibition of radio apparatus is the largest in the history of the industry."

The 10" x 7½" glossy, 48-page program features many full-page ads extolling period consoles, including the RCA Radiola 33 cathedral console with an RCA 106 speaker, the Kylectron, a Freed-Eisemann, a Day-Fan, a Steinite, and an Earl. Also included are Silver Marshall consoles, Atwater Kent radios in Pooley and Red Lion cabinets, and the Radiolas shown in Figure 1.

Other ads feature such tube manufacturers as Triad, DeForest, Champion (shown in Figure 2), and CeCo. In all, 60 advertisers — radio sales and service companies, hotels, restaurants,



Tune in on the TRIADORS every Friday evening, 8 to 8:30 (Eastern Standard Time) over WJZ and associated NBC stations.
There is a TRIAD tube for every radio need. "Ask for the tube in the black and yellow triangular box."

Figure 5. Madison Avenue sales gimmicks were alive and well in 1929 — the Triad tube had the Triadors singing its praises every Friday evening on NBC stations.

RADIO RAMBLINGS...

90-Day Guarantee

BY CHET WISNER

When I was released from the service in the U.S. Navy at the end of World War II, I decided that it would be a good deal to operate a radio repair shop. I'd been interested in radio since age 13, and while in the Navy, I had been an Aviation Radio Man (ARM1/C) serving on big 2-engine and 4-engine seaplanes/flying boats. I had gone through the Navy/RCA radio school in New York City on West 52nd Street and also the Naval Training Center at Memphis, Tennessee.

OUR 1940s RADIO SHOP BUSINESS

After looking around a bit, Marie, my wife of one year, and I found a fellow who had a one-man and (one-woman) radio shop for sale in Pittsfield, Massachusetts. His reason for selling was that he had health problems, but he also had been offered a job with a local radio broadcast station. We took over the shop on March 1, 1946.

At first, repair parts and tubes were hard to get, but we had a fairly good connection with a local parts dealer. There were lots of radios needing repair at this time as there had been no radios sold since 1942. The most common troubles with the sets were filter condensers (now caps), volume controls, speakers and failed tubes. It was amazing how many tube substitutions had been made during the war. Some were simple cross reference types, and some were "simple" wiring changes, usually with no reference or record of the changes made!

In due time, new table model radios began to be available for sale and were in pretty strong demand. Still, many people clung to their more costly multiband console sets. Even the man we rented our store from had a big General Electric 10-tube, all-band set. It needed repair, and since he lived only a couple of doors from the store, he and his son carried the set to our shop.

Problems — a bad hum, and only 4 or 5 stations were received on the broadcast band. Like most customers he said, "Fix it and give me a call when it's ready." Repair consisted of the replacement of 2 filter caps and 2 bad tubes. Cost of parts: $6.75; cost of labor: $2.25. Total: $9.00.

I gave him a call and told him the set was ready. Although he thought the repair bill was pretty high, he admitted that the set sure sounded lots better than it had for three to four years. He was concerned about a guarantee on the repairs. I assured him that we gave a guarantee on all parts and labor for 90 days. This pleased him, and he said, "O.K. take the $9.00 off next month's rent." This pleased us.

We ran the shop until 1950, when I was recalled to the Navy for active service, due to the Korean conflict. When I returned to civilian life, I took a job with the General Electric Co. as an instrument technician. I didn't get involved in a radio repair shop again.

Chet Wisner sitting at the 10-tube GE console and holding the 90-day claim check dated January 11, 1946.

A FEW DECADES LATER

One Sunday at church in 1994, a friend, Charles Najimy, noticed the ham radio call letters on my pickup truck number plates and asked if I did any radio repair work. I said that I did some for friends. He asked if I could get a set with a problem going again. I told him to bring in the tubes, and I would test them for him. I told him to mark the tubes and sockets so that he would be sure to get the right tubes in the right places again. I also told him to clean the tube pins with a bit of fine sandpaper, and to rock the tubes in the sockets a couple of times when he replaced them. All tested O.K.!

The next Sunday Charlie asked me if I had once run a radio repair shop on Elm Street in Pittsfield. I admitted that I had back in the late 1940s. Then he produced a claim check from "Chet's Radio Service" dated January 11, 1946. Seems his uncle was the man we had rented our shop from, and he had given Charlie that big 10-tube General Electric set when he moved to California!! Then Charlie laughingly asked if the guarantee was still good on it. I told him a 90-day guarantee could hardly stretch to 48 years!

Later Marie and I had lunch with Charlie and his wife Sherrie and then listened to the big GE set on broadcast and shortwave bands. We also took several pictures of us next to the big radio, plus a couple of closeups of the original claim check. We all got a good chuckle or two over the 90-day guarantee!

(Chet Wisner, W1VSR, 1014 Main St., Dalton, MA 01226)

Tuning That Old Battery Set

BY DWANE STEVENS

This article explains an interesting development that many of us have not thought about much — why a 1920s TRF tunes so differently from a modern set. Dwayne Stevens works on a favorite A.R.C. premise — that better understanding leads to better appreciation. In that regard, when more information surfaced in the A.R.C. library, we decided to add it to Wayne's article. (Editor)

In thinking about dial twisting, picture yourself tuning your favorite 1920s TRF battery set. You notice that nearly all the stations seem crowded together at the low end of the dial. You also notice that the higher frequency stations are on the low end of the dial while the lower frequency stations are on the high end! Ever wonder why? Well, if you would like to know the answer, then read on because there is an interesting story behind it all.

Back in the early 1920s when more and more broadcast stations began to appear, the government set standards for them. A standard broadcast band, which ranged from 200 meters to 600 meters with 10 Kc spacing between station assignments, came into being. At this time, the radio community had not made the transition from thinking in terms of wavelengths to that of frequency. Broadcast stations were thought to be on certain "wavelengths" instead of certain "frequencies," as we call them today. So for purposes in this discussion, the 200 meter end of the band is actually 1500 Kc and the 600 meter end is actually 500 Kc.

TUNING DIALS

A common feature of 1920s radio sets was that the tuning dials were marked, not in wavelength or frequency, but with a scale running from 0 to 100, the smallest division mark being 1. Also, since everyone thought in terms of wavelength, and since the broadcast band ran from 200 meters to 600 meters, it was logical to have the dial in a similar ascending order. A zero dial setting corresponded to 200 meters, while a 100 dial setting equaled 600 meters.

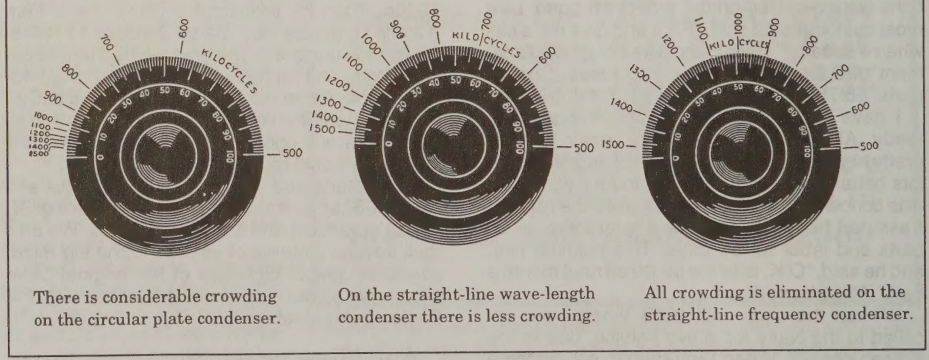
This 0-100 dial scale was also used as a logging scale. When a favorite station was located, its dial position was recorded and used later to relocate it quickly. If your set had more than one tuning dial, then all dial positions were recorded for later use. Marking the dials in meters was of no use, since most radios were not that accurate anyway.

This arrangement seemed perfectly normal in the early 1920s because of the wavelength way of thinking. Since wavelength and frequency are inversely proportional, however, the high frequency stations appeared at the low numbered end of the dial scale, while the low frequency stations appeared at the high numbered end. This all seems perfectly backwards to us, since today we think in terms of frequency instead of wavelength.

TUNING CONDENSER CONSTRUCTION

OK, that explains part of the problem. But, what about most of the stations being bunched up at the low end of the dial? The answer lies in the way that tuning condensers were constructed.

Recall that TRF sets utilized a simple tuning arrangement consisting of a fixed inductor or coil in parallel with a variable condenser. Turning the front panel dial varied the condenser which enabled the tuning circuit to select the frequency



There is considerable crowding on the circular plate condenser.

On the straight-line wave-length condenser there is less crowding.

All crowding is eliminated on the straight-line frequency condenser.

Figure 1. Examples of the relationship between tuning capacitor type and dial calibration.

(oops, wavelength) you desired. The physical shape of the condenser plates, therefore, determined the frequency curve of the tuning circuit.

We find then, with regard to the variation of capacity to the setting of the condenser dial, that there were three important shapes of condenser plates at the time. These shapes were such that:

1. The variation of *capacity* with dial setting is *linear.*
2. The variation of *wavelength* of the tuned circuit with dial setting is *linear.*
3. The variation of *frequency* of the tuned circuit with dial setting is *linear.*

Originally the plates in such condensers were generally semicircular in shape, more for simplicity of mechanical construction than for any other reason. This semicircular shape produces condition #1 above — a variation of capacity with dial setting which is linear; that is, as the dial setting is increased from 0 to 100, the capacitance increases from near zero up to its maximum value in equal increments.

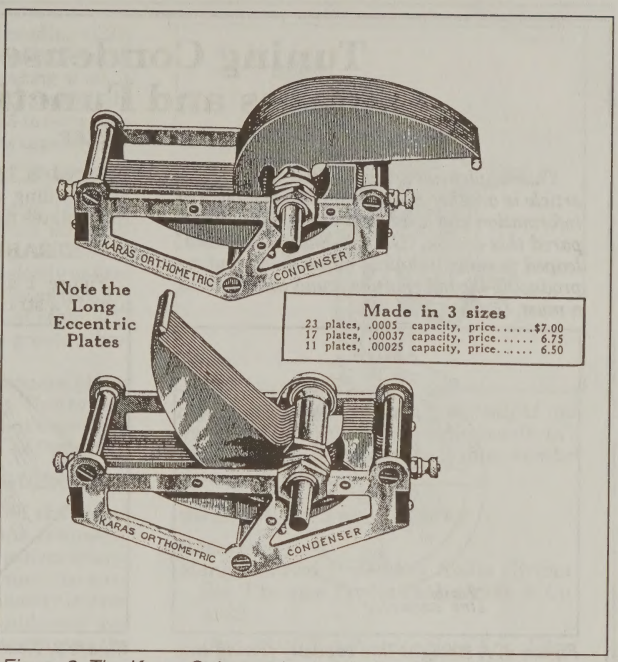


Figure 2. The Karas Orthometric straight-line frequency condenser.

The result, however, is that frequencies are tuned in a nonlinear fashion, with stations being tuned very quickly at the low end (high frequency) of the dial and much more slowly at the high end (low frequency) — thus, the crowding effect. This was called "straight line capacitance tuning," because, when plotted on a graph of the 0 to 100 dial scale versus capacitance, a straight line is produced.

This relationship is illustrated by the dial on the left in Figure 1. Each dial is referenced with kilocycle marks along the outside for our convenience. Notice on the first dial how the frequencies are crowded to one end because of the circular plate condenser.

The center dial represents an improvement on the straight line capacitance tuning method because the condenser plates were cut to a different shape to produce condition #2 above. Here, the shape of the condenser plates was such that the variation of wavelength with the dial setting is linear; that is, as the dial setting is increased from 0 to 100, the wavelength increases from 200 meters to 600 meters in equal increments. As a result, frequencies are spread out more and less crowded. This type of condenser was called a "straight-line wavelength condenser," because, when plotted on a graph of the 0 to 100 dial scale versus wavelength, a straight line is produced.

The dial, shown on the right, represents the final solution to the crowding problem. Here the condenser plates are shaped to produce condition # 3 above — the variation of frequency with the dial setting is linear; that is, as the dial setting is increased from 0 to 100, the frequency changes in equal increments. Because frequencies are now evenly distributed around the dial, all crowding is eliminated. This type of condenser was called a "straight-line frequency condenser" because, when plotted on a graph of the 0-100 dial scale versus frequency, a straight line is produced.

One such condenser responsible for this convenience is the one shown in Figure 2. The Karas Orthometric condenser was made by the Karas Electric Co. of Chicago, Illinois, and had specially designed plates to produce the desired effect in the tuning circuit. A Karas Electric Co. advertisement on page 207 in the August 1925 *Radio News* states: "This clean cut separation of stations insures clearer, better reception than you have ever known because you receive all the side bands without interference from adjoining stations — interference that is unavoidable with old types of condensers which crowd low wavelength stations so confusingly close together."

So the next time you fire up your favorite 1920s TRF and start dial twisting, you will understand why the set tunes so differently from the modern sets of today. Along with better understanding comes greater appreciation of both the old and the new.

(Dwane Stevens, KC5MT, Rt. 3, Box 25A, Ardmore, OK 73401)

Dwane Stevens has been an amateur radio operator for 17 years and holds an Advanced Class license, while his wife, son, and daughter hold Technician Class licenses. He enjoys repairing and restoring 1920s battery sets and early AC sets, as well as collecting tubes, repair manuals, and old radio magazines.

Tuning Condensers: Shapes and Functions

BY RAY BINTLIFF

This supplement to Wayne Stevens' very good article is another example of how one piece of information can lead to another. As we prepared this article, "Drake's Radio Cylopedia" leaped to some technical minds here, and reproducing the information found there seemed a must. (Editor)

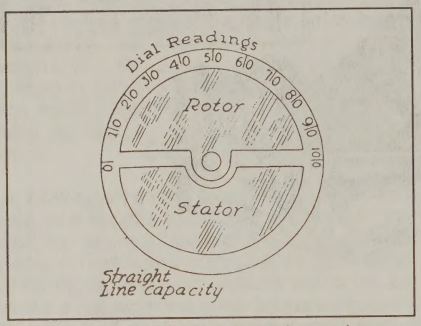

Figure 1. A straight-line capacity tuning condenser with its conventional semi-circular plates.

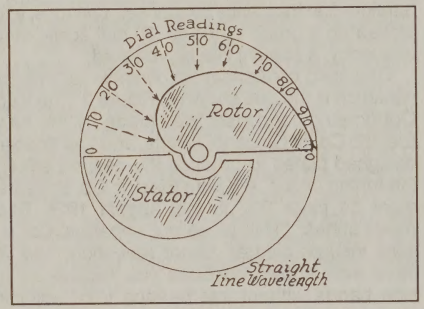

Figure 2. A straight-line wavelength tuning condenser with its shaped plates. Note the position of the rotor plates in relation to the dial reading.

The illustrations shown here have been reproduced from *Drake's Radio Cyclopedia* published in 1929. The book describes and illustrates variable condensers that are designed to function as straight-line capacity, straight-line wavelength, or straight-line frequency tuning condensers. Some rather unusual condenser shapes are included.

Figures 1, 2 and 4 show examples of each type of tuning condenser and the shape of their plates. Also depicted is the relationship between the dial reading and the point at which the rotor plates mesh with the stator plates.

STRAIGHT-LINE CAPACITY

Figure 1 shows the semi-circular plates used in a straight-line capacity (SLC) tuning

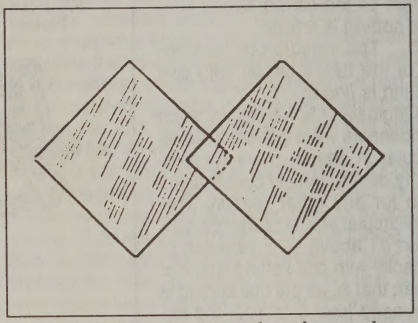

Figure 3. This unusual set of condenser plates will produce straight-line wavelength tuning.

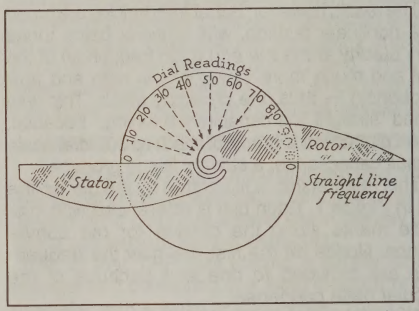

Figure 4. A straight-line frequency tuning condenser with plates that are much longer than the other two types of tuning condensers.

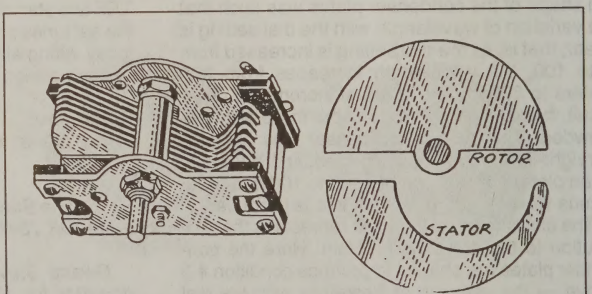

Figure 5. A version of a straight-line frequency tuning condenser that is much smaller than the unit shown in Figure 4. Note the semi-circular rotor and the odd shaped stator.

condenser. When set at a dial reading of 25, the condenser will be at 25 percent of its full capacity. When set at a dial reading of 50, it will be at 50 percent of its full capacity. Increasing the dial setting from 25 to 50 results in a doubling of the condenser's capacity.

STRAIGHT-LINE WAVELENGTH

Figure 2 depicts the shape of the condenser plates that will produce straight-line wavelength (SLW) tuning. With SLW tuning, the capacity increases slowly at first and then increases more rapidly as the dial setting is increased. With a dial reading of 50, the capacity is four times greater than when the dial is set to 25.

Figure 3 depicts a pair of square plates that will produce SLW tuning. This type of construction is not practical, but does illustrate a means of obtaining SLW tuning.

STRAIGHT-LINE FREQUENCY

Figure 4 shows the shape of the plates that will produce straight-line frequency (SLF) tuning. These plates are more sharply tapered than the SLW plates. As a result, the initial increase in capacity is even slower than with the SLW condenser and then increases at an even faster rate as the dial setting is increased.

The shape of the plates of the SLF condenser, shown in Figure 4, dictates that the physical size of the condenser be quite wide. The size of a SLF condenser can be reduced by using the plate configuration, shown in Figure 5. Note that the rotor plates are of the conventional semi-circular style and the stator plates have been shaped to produce SLF tuning.

Another technique for reducing the width of a SLF condenser is to use a greater number of smaller plates. This type of capacitor is illustrated in Figure 6.

Figure 7 shows a rather complicated scheme to achieve SLF tuning. In this example, the thickness of the condenser's plates varies from one side to the other. As the thickness of the plates increases, the spacing between them decreases and thus the capacity increases at a faster rate.

Most SLF condensers are modified versions that use true SLF characteristics as the plates first mesh but use a compromise between SLF and SLW at the other end of the plates, as shown in Figure 8.

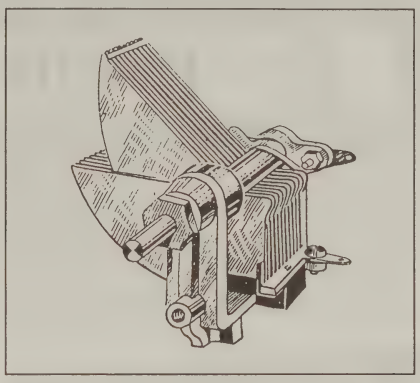

Figure 6. Another version of a straight-line frequency tuning condenser that results in a smaller width by the use of a greater number of smaller plates.

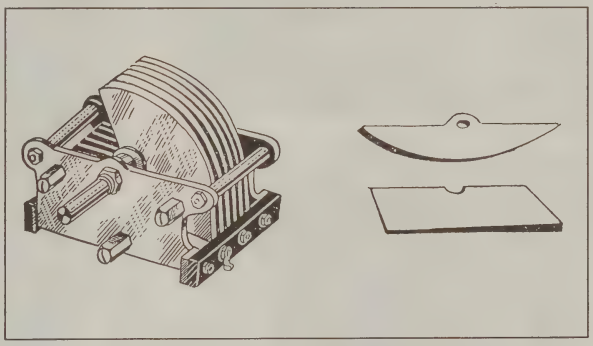

Figure 7. The use of plates that vary in thickness results in a compact straight-line frequency condenser.

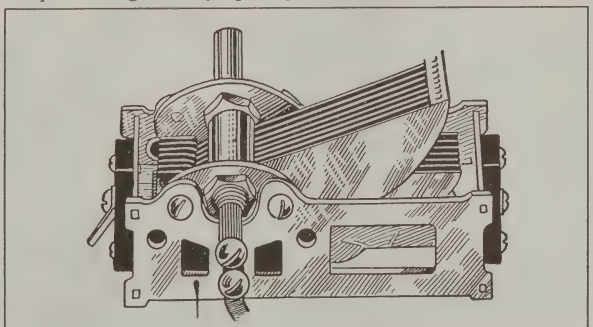

Figure 8. A modified straight-line frequency condenser that combines SLF and SLW characteristics.

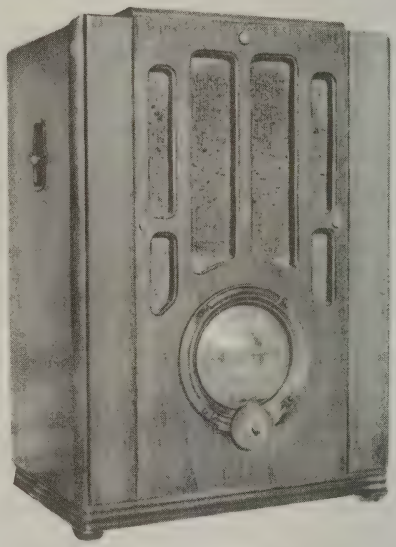
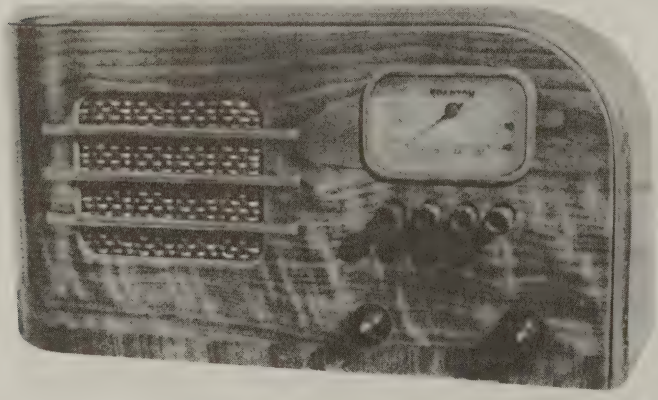
PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

"RCA VICTOR RADIOS" ADVERTISING SIGN – This RCA Victor Radios advertising sign measures 2' x 2' and features Nipper, a crank phonograph, the words "His Master's Voice," and an RCA banner on an oak board. On the reverse side, the designer is identified as W.L. Stensgaard & Associates, Chicago, Illinois. *(D. Gonshor – Littleton, CO)*

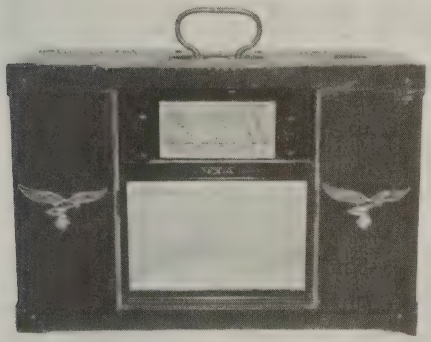


TELEVIAN MODEL M-3B4 – This 3-tube Japanese tombstone uses two Type 12-A7 tubes and one Type UY-24B tube. It is housed in a solid wooden cabinet with a wooden back cover. *(R. Suslovich – McLean, VA)*



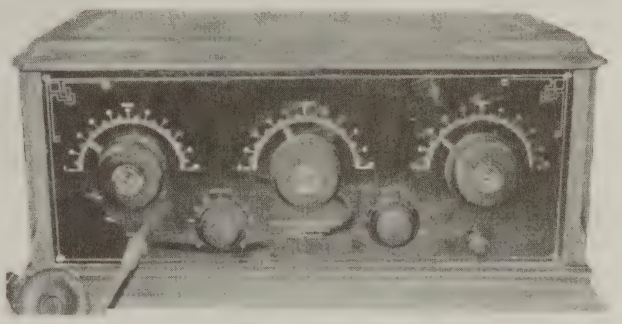
SPARTON MODEL UNKNOWN – This 5-tube radio is housed in a wood-grained metal cabinet with a chrome grille and trim. The tube types are 6A7, 75, 78, 42 and 80. *(John Schehrer – Joplin, MO)*

PHOTO REVIEW



NORA RADIO TYPE K62 – This olive-drab colored, German-manufactured radio, found by a U.S. soldier in 1945, operates by battery or by a 220 VAC line. Depressing a button on top of the radio opens the two spring-loaded doors to reveal the control knobs, tuning dial, and speaker. The Nazi party emblem is displayed on the inside of the doors. A German officer's name appears on the speaker grille cloth. *(Hank Trabold – Toms River, NJ)*

GENERAL INSTRUMENT CORPORATION MODEL UNKNOWN – This 3-dialer battery set, circa mid-1920s, uses six Type CX301A tubes. Does anyone have any information about General Instrument's products? *(Steve Perlep – W. Melbourne, FL)*



NORTHERN ELECTRIC MODEL 1121A – This 11-tube Canadian radio tunes the BC band, the police band, and 3 SW bands. It features bandspread tuning on the SW bands and AFC on the BC band. A "fidelity control switch" controls the selectivity of the two IF stages. *(Marcel La Bossiere – Marmora, Ontario, Canada)*

DEFOREST/CROSLEY TYPE 1721 – Produced by Rogers Radio of Toronto, Ontario, Canada, this 7-tube AC radio tunes the BC band and one SW band. *(Marcel La Bossiere – Marmora, Ontario, Canada)*

RESTORATION TOPICS

Magnavox Eton Model T "Pull-out" Set

BY JOSEPH WOOD

A radio amateur was having a garage sale. He was moving out and had a lot of really old equipment to sell — earphones, mikes, variable condensers, and a lot more 1920s stuff.

I picked up an old wooden case radio — an Eton Model T "pull-out" set — which was a basket case. But, this basket case really looked good. While I was acting as if I didn't think I wanted it, a voice shouted, "You can have that for two bucks."

I gleefully replied, "Boy, I'm gonna make a radio out of this." Well, I finally kept my promise. I unpacked it after letting it sit for many years and started to restore it. Figure 1 shows the set in its disassembled state.

Although this restoration is not likely to be judged as "mint," it looks very good, as shown in Figure 2. It is a charming conversation piece that takes us all the way back to early tube radios. A brass tag at the back of the drawer contains the following information: "Manufactured by the Magnavox Company, Oakland, California – U.S.A. Patented T #18128, made in the U.S.A."

The large, all brass, variable condenser is really the gem in this radio. It is a 3-gang, 63-plate unit, suggesting that this is a 3-stage tuned radio frequency receiver. It's all there — escutcheon plate, dial scale and metal-stamped knob.

The drawer pull makes this a very strange radio. The custom drawer is of rugged construction and has a 1-inch thick front panel with a redwood veneer finish. The main tuning knob, together with the dial hardware and adjacent knobs, makes this an attractive set. When assembled with the large variable condenser and metal chassis, the set fits into the drawer somewhat midway and leaves a space above and below it to mount the three RF coils, two transformers, and other parts.

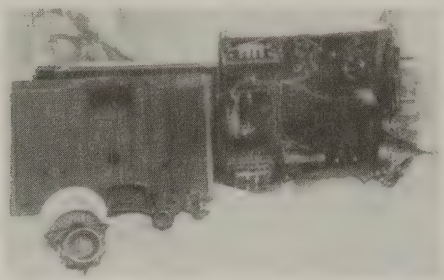


Figure 1. The Magnavox Eton Model T in a disassembled state.

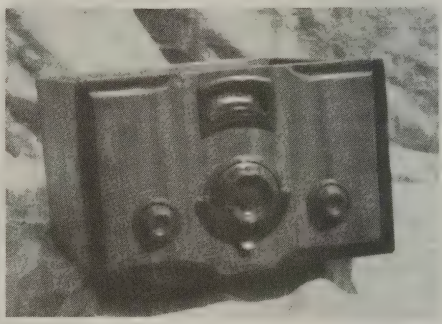

Figure 2. Front view of the Magnavox Eton Model T, ca. 1927, made to slide into a cabinet, which is missing.

The Bakelite and metal chassis has sockets for five 4-prong tubes. The tube complement, easily seen in Figure 3, consists of five Type 01-As used as 1st RF, 2nd RF, detector, 1st audio, and audio output. Beside the detector tube is a clip to hold a grid leak resistor. A crude, spring brass on/off switch is actuated by a cam attached to the on/off switch knob. The knob on the right of the panel is attached to a very old type of wire-wound rheostat. Behind the transformer on the left of the panel are two output terminals for a speaker or a pair of headphones.

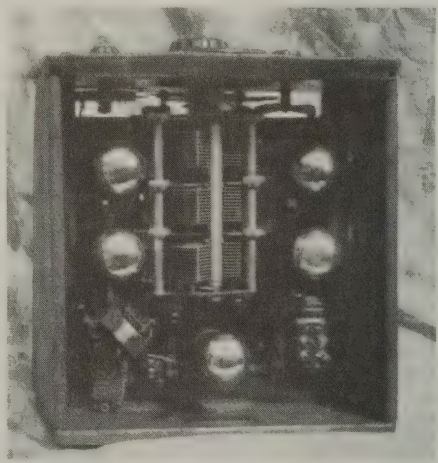

Figure 3. Top view of the Magnavox showing the tubes, 3-gang condenser, and audio transformers.

This battery-powered set is made to be installed in a cabinet, which I do not have. However, the sketch in Figure 4 shows what the radio would look like if it were installed in a desk.

If this set does end up in a desk, guess whose desk it will be?

(Joseph Wood, 6511 Chester Ave., Hogkins, IL 60526)

Joseph Wood, a Radio Amateur, has a degree in radio communications. An avid collector of antique radios, he is an active member of the Morse Telegraph Club.

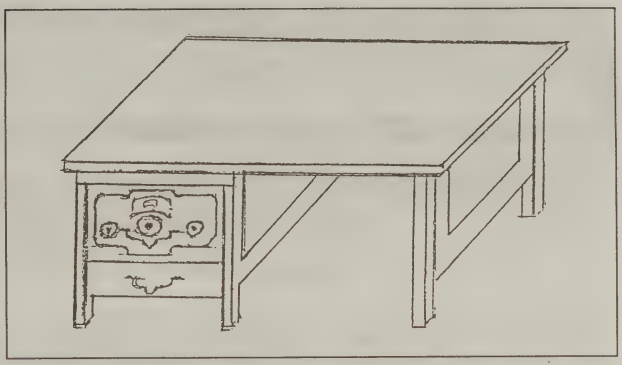

Figure 4. This suggested desk installation may give the owners of a "cabinetless" Magnavox the incentive to build a home for their sets.

Memories of A Boy Radio Bug

A Fifth Breed of Collector

BY DAVID M. DAVIES

Aside from the four breeds of collectors described in that wonderful article in the February 1995 issue of A.R.C., there is yet another kind — the "boy radio bug." I fear that readers who got into this game after about 1950 have not experienced the thrills, wonderment, and magic that some of us grew up with.

The amber dials with shortwave bands and call letters of stations around the country were awesome. The outdoor antennas and RF amplifiers were a DX-er's dream. Along with the sights and sounds, there were smells, too. A radio with several hot, dusty tubes still sends chills up my back, as do burning resistors and rosin-core solder. I'm not crazy, folks — I'll bet there are a lot of you reading this right now who remember the glory days.

Saturday nights in the 1940s, I went to sleep on the living room davenport with three Type 47s lighting the room through the amber dial on an Airline console. It was tuned those nights, with millions of others, to WSM. Every Saturday night as I lay there, I marveled at the thought that in Nashville, Tennessee (700 miles away), some strange signal was being transmitted from a tall tower, connected somehow to microphones at the auditorium. It remained a mystery until a teacher transmitted an "electro-magnetic wave" across the room to an antenna, coil and light bulb I was holding. When the light bulb lit up, I was hooked!

Popular Science had an article on building your own crystal radio set, so I told Mom to save me a Quaker Oats box, prescribed in the parts list as the "coil form." Someone told me that Mr. Kidder up on Washington Avenue had "tuning capacitors," "crystals" and "coil wire." I rode my bike up there, and sure enough, he had all those things and more. He was very helpful, and I got the parts for a total of 35 cents. When I jiggled the catwhisker and tuned in WIBA, it was a thrill never to be forgotten.

I used to take junk to the town dump in my red wagon. When I started finding good stuff there and hauling it home, the folks said I was bringing more home than I was taking over. So, realizing that this was my calling at the young age of 12, they got me a larger wagon which I towed behind the bike for quicker trips. I still have a couple of those radios I found. There were also wires, transformers and almost anything electrical you can imagine.

The forties also brought the war and Truax Army Air Force Base, a major radio and electronics service school, just a short ride from my house. One of the instructors, a good friend of the family, helped me make motors and radios, and spoke of tubes, and capacitors, and the mysterious "electromagnetic wave."

When I was 15, a neighbor with a small-town Gambles store went into radio and television and was a big supplier for a large country area. I learned early in the game to swap tubes, turn antennas, and clean tuners. Somewhere along the line I put the tube, capacitor, resistor, radio and television stories all together and went into ham radio. With the TV tower across the street at the Gambles man's house, and several high-wire antennas at my house, the neighborhood looked really neat! Then people discovered that while I was "on the air," they could hold small fluorescent tubes in their hands outside my window and the tubes would light.

I could go on, but the thrills of bringing television to a city in the early 1950s is another story for another time.

(David M. Davies, 701 W. Albee Rd., Nokomis, FL 34275)

AUCTION REPORT

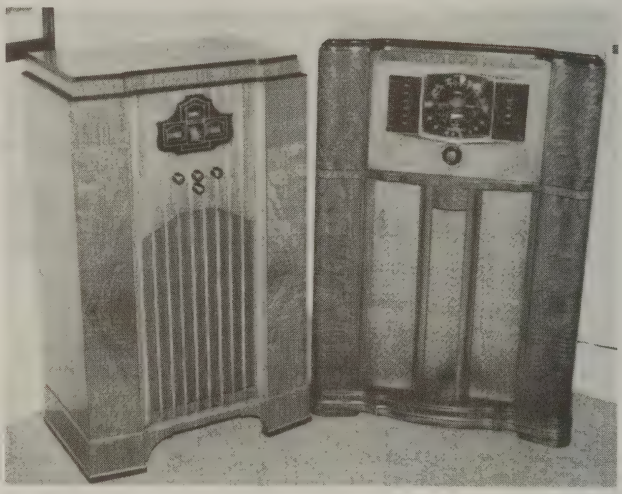
Vintage Radio Auction — April 13, 1996
Marshalltown, Iowa

REPORTED BY JIM BOELLSTORFF

The Gene Harris Antique Auction Center in Marshalltown, Iowa, held its sixth annual radio auction Saturday April 13, 1996. Gene Harris, Julie Harris Stern, and Dale Albee were the auctioneers for the sale which drew 147 registered bidders for 612 lots of merchandise.

Auction highlights were a Scott 26-tube radio in a heavily carved custom cabinet for $1,450, a Fada 1000 Catalin for $850, a Zenith Aviatrix for $800, a Kennedy VI for $450, a Zenith Windcharger and a Stromberg-Carlson 231-F chairside, each for $400.

The general quality of consignments had improved over the last auction with many desirable electric sets offered. Battery sets were very scarce, Catalins virtually non-existent, and transistor and transistor novelties few.



A Zenith 767 Aviatrix (left) brought $800, while a Zenith 10-S-567 (right) went for $250.

The following listing is a selection of lots from the auction. Some model numbers were missed, and accuracy of the report is not guaranteed. The prices do not include a 10 percent buyer' s fee.

e=excellent, vg=very good, g=good, p=poor, R/P=radio-phono, NT=no tubes, BBT=brass based, tipped

Aircastle 108014, g $27
Airline 04BR-508, g 80

A warning: *Auction prices are not current values. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.*

VRPS Spring Auction — March 23, 1996 Irving, Texas

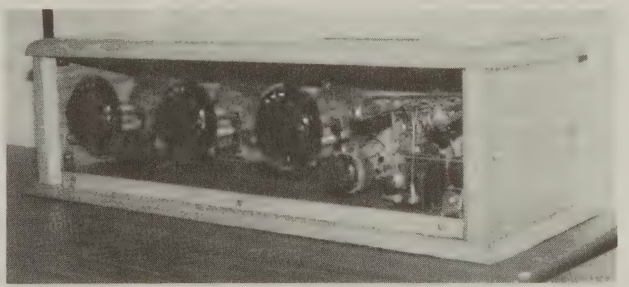
COMPILED BY GEORGE AND MICHAEL POTTER

The annual Vintage Radio & Phonograph Society (VRPS) Spring Auction was held at the Holiday Inn DFW South in Irving, Texas, on March 23, 1996. Auction sales totaled $22,515, surpassing last year's auction by over $6,000; 392 items sold with fewer than 20 passes. Jim Sargent stepped in on short notice to substitute for Mike Sherman as auctioneer and did a fine job.

Auction highlights included the following: a Bendix 526 green Catalin (cracked) going for $190; a Radiola V, missing the lid but with the original crystal detector, for $220; a nice Edison Amberola 30 with 6 phono cylinders for $410; and an excellent Zenith Model 6A20 console/phono for $210. An Admiral 151-626 slant-front console, with tuning eye and a Buck Rogers' style dial, got everyone's attention due to a $360 final bid.

Again this year 1930s wood sets and consoles were a little flat. However, phonographs received the bids they deserve. No guarantees are made as to condition or status of the items listed here. Some test equipment, incomplete listings, and boxes of tubes were excluded from this list.

e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown, WT=with tubes, NT=no tubes, N.I.B.=new in box, BB=brass-based



This glass-faced home brew commanded $220 in the final bid.

Admiral 5E23, g $38

VRPS publishes "The Reproducer" quarterly and "Soundwaves" monthly. The club hosts an annual 3-day convention, a spring auction, 2 swapfests and monthly meetings.

Old Radio Auction — May 17, 1996
Whalen Auction Service — Neapolis, Ohio

REPORTED BY DON KAHLE, W8PRQ

Approximately 50 people attended the Old Radio Auction held at the Whalen Auction Building, Neapolis, Ohio (20 miles southwest of Toledo), on Friday May 17, 1996. Some came from as far away as Key West, Florida.

The auction house was a pleasant place, and the auctioneer moved things along well. He also had a way of making this a fun experience. All the radios and "stuff" were clean, and most were working. The prices listed here are correct, thanks to my wife Shirley who watched closely. I was looking for old Crosley battery sets, but, unfortunately, there were none.

Auction highlights included a Zenith 530 lowboy with an ornate cabinet going for $875, a Zenith 9S268 shutter dial for $325, a Philco 70 cathedral for $175, an RCA 5T tombstone for $125, and a Stromberg-Carlson Duncan Phyfe drop-leaf table set for $270. No buyer's premium was added.

The 10 A.M. auction was over by about 1 P.M., and we enjoyed it very much. We met a lot of new people, as well as old friends.

RADIO MISCELLANEA

"Antique Radio Classified" invites its readers to contribute letters and information for inclusion in "Radio Miscellanea" and elsewhere in the magazine. The topic should be of general interest and sent to A.R.C., P.O. Box 2, Carlisle, MA 01741. All material submitted should be verified for accuracy and may be edited for publication, which is not guaranteed. See the masthead for more details.

A "Radio" Wedding

Dear Editor:

Antique radio collecting can spill into other parts of our lives, often in unusual ways. In an effort to "personalize" our wedding reception, my wife came up with a unique idea. Instead of the usual "wishing well" or a wrapped box for depositing cards, I constructed something out of the ordinary. I covered the back of an empty Philco tombstone cabinet, leaving only a small slot open near the top. The knobs were placed on dummy shafts and across the dial face a note was diplayed saying, "Thank you."

Although some people had a hard time finding the slot, the radio was a good conversation piece. Please note — care was taken not to alter the radio permanently; it will be restored to its original condition.

The final "old radio" touch for this special occasion was my gift to my two ushers — a one year, first class subscription to *Antique Radio Classified* .

Spencer J.Doggett, Washington, MI

A bride who "thinks radios" makes Spencer a lucky man. (Editor)

Seeks Farnsworth Information

Dear Editor:

I am researching the life of Philo R. Farnsworth and hope shortly to publish a documented biography. I am interested in interviewing any individuals who knew or may have worked with Dr. Farnsworth.

If you could write to the address below or call and leave a message in the evening, I will return your call, and we can talk on my nickel.

Donald G. Godfrey, Walter Cronkite School of Journalism, P.O. Box 871305, Arizona State University, Tempe, AZ 85287-1305. (602) 965-8661.

Radio Nuts & Crazies Read A.R.C.

Dear Editor:

I thoroughly enjoy your publication and would like to take this time to thank you all for the fine job you do. Your articles are superb, and most of the people I have met through ads have been very nice. What a wonderful bunch of people we radio nuts are!

Mark Minks, Liberal, KS

Dear Editor:

Congratulations on your continuously great magazine! It is wonderful to have a medium such as A.R.C. which unites all of us — "the crazies" of nice old radios!

Sylvain Grégoire, Laval, Quebec, Canada

RCA Identifed

Dear Editor:

The RCA receiver " Model Unknown " for the visually impaired on page 15 of the June 1996 issue is Model RZC 375W.

B.A. Zarski, Milwaukee, WI

June Cover — Colorful & Dangerous

Dear Editor:

The cover for the June issue is the prettiest yet. Are those the original colors? I never saw a Silvertone 4511 that color before.

Jim Gauldin, Danville, VA

Believe it or not, lavender is an accurate color for the Silvertone 4511. It has also been seen in another unusual color — dark green. A search should be on for that one. Incidentally, we held a copy of the cover up to the original radios and were amazed at how closely the colors matched. (Editor)

Dear Editor:

Just got my June A.R.C. — the 12th anniversary issue sure looks great. However, there's a little danger with your front cover — my wife sure took notice and said, "Why don't you collect these types of radios?" I may have to charge you damages if I begin collecting these rare radios.

David Moore, Pearland, TX

Dachis Book Good Reading

Dear Editor:

I enjoyed meeting you at the Dayton Hamvention where I picked up a copy of Chuck Dachis' *Radios By Hallicrafters* from you. I have had a hard time putting it down — but I did find time to go through the June issue of A.R.C.! Keep up the good work.

Burton L. Pratt, Montgomery, AL

A.R.C. Works!

Dear Editor:

I used A.R.C. to sell off items from my father-in-law's estate. Your magazine works! Thank you.

Don Wagnon, Fairview, TX

Dear Editor:

I wish to tell you that I've just renewed my subscription for the third year and really enjoy and look forward to the magazine every month. I just started collecting a few radios about four years ago and had no idea what collecting them would be like. I have just started to repair my own and have found your tech articles very helpful. I really like the one in the May issue — it contains a world of info for the novice like me. Thanks for the excellent magazine.

Larry Larmeu, Jefferson, LA

Gernsback Author Wanted

Dear Editor:

I have collected radios since the early 1960s when there were no books on radio collecting. But, there were many radio magazines with articles on the radio pioneers. There was one person who wrote more on radio than any of the rest, but no one has written about him or published his picture — Hugo Gernsback.

John Johnson, Fowlerville, MI

Any authors looking for a subject out there? (Editor)

EXTRAVAGANZA '96

Hosted by the Michigan Antique Radio Club

July 12-14, 1996

Holiday Inn South Convention Center
6820 S. Cedar Street, Lansing, MI 48911
(517) 694-8123

Come join us and celebrate our 11th anniversary!

MARC's TOP 10 REASONS WHY YOU SHOULD ATTEND EXTRAVAGANZA '96

1. Flea Market...we have nearly 400 contiguous spaces available for sellers, come help us fill them up!
2. Our meet runs Friday-Sunday as advertised...we STARTED the trend of not allowing early selling (you can really get here Friday morning and not miss anything) and in addition, you don't have to take a whole week off from work to attend our convention!
3. Rich Estes, who conducted the recent Henry Ford Museum Auction, will be the auctioneer for our Friday evening auction!
4. Low costs...we have reduced our family registration to $12 this year ($15 last year) and again will offer our flea market spaces after the first one for ONLY $10 each!
5. The theme of our meet will be Grebe...and we will have Alfred Grebe Jr. as our keynote speaker at our Social Hour Saturday evening!
6. We will have an outstanding Grebe exhibit in support of the theme of our convention, in which we encourage you to participate!
7. For the first time, we will be offering selling spaces UNDER our unique Big-Top tent in the center of our flea market!
8. Last year we had attendees in from 29 states, Canada and Australia. If you can only attend one major antique radio show this year, EXTRAVAGANZA '96 should be your choice!
9. You know that large multiband Fada tombstone (22" tall) that everyone is looking for (see photo A.R.C. Jan. 1996 issue, page 61)...we are raffling off an excellent example of this radio at EXTRAVAGANZA '96!
10. HOSPITALITY...we treat you right, just ask anyone who has ever attended an EXTRAVAGANZA convention. We want you here...and bring your family too. We encourage you to attend EXTRAVAGANZA '96 to see and experience for yourself what your friends have been telling you!

EXTRAVAGANZA '96 Registration

Note: Everyone attending EXTRAVAGANZA must register! Additionally, you must be a current MARC member or join MARC at this time in order to participate in the auction or equipment contest and/or to sell in the flea market.

REGISTRATION	*TOTAL*
Family registration →	$ 12
MARC membership (if not currently MARC member)	
Balance of 1996 ($6) →	$

Vacuum Tube Repair Wafers

These tube repair wafers are solid-state devices for quick and easy repair of early vacuum tubes. The wafer is installed by simply sliding it over the tube pins and reinserting the tube into its socket. If the filament is intact, but there is little or no emission, the filament may be lit for best visual effect. However, the tube can be open filament.

No change in radio operating voltages is required. Any number of tubes may be repaired in a radio. If wafers are installed on all tubes, the B+ voltage may usually be reduced without sacrificing volume or sensitivity. Performance will vary between radio models.

$10.00/each ($7.50/ea. 3 or more)

New Atwater Kent Breadboard Switch

Exact replacement for Models:
9 • 9C • 10 • 10A • 10B • 10C • 12
and all additional models with board mounted switch.

Newly manufactured under high pressure heat from the same type brown thermoset resin used in the original. Beryllium copper spring contacts are used for long, trouble-free life. Custom built knurl is used to exactly reproduce the original.

$50.00/each

RADIOFEST '96

August 28th, 29th, 30th and 31st

Holiday Inn Holidome and Convention Center
345 River Road, Elgin, IL 60123
Phone (847) 695-5000

Room reservations are now being accepted in blocks of three or four consecutive days only. One or two day reservations will be accepted after June 25th, as permitted by remaining hotel space.

ARCI is also pleased to offer an "Early Reservation Discount Package" to those persons reserving the first 160 rooms for Wed., Thurs. and Fri. nights, August 28th, 29th and 30th, at the special 1-4 person rate of $72 + 9½% tax per room per night. In order to be eligible for the Discount Package, room reservations must be made directly with the Holiday Inn, must include the above three nights, and the person making the reservations must identify him/herself as being with the Antique Radio Group. All parking lot assignments will be made by ARCI on a first registered, first served basis. Pre-registration is necessary to help insure a seller's space. Last day for pre-registration is July 29.

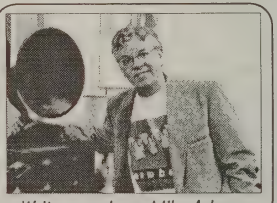
The "Radio Collector" Video

Writer-producer Mike Adams and the Perham Foundation Electronics Museum are pleased to present the original, best-selling PBS series, "Radio Collector". Nominated for an Emmy, Best Information Series, "Radio Collector" is now available complete and uncut. All five half hour shows have been newly duplicated from the original broadcast masters.

Order the Popular VHS Videotape "Radio Collector" Directly From the Perham Foundation!



Writer-producer Mike Adams

You'll meet dozens of collectors and experts, see hundreds of radios made between 1900 and 1960, plus you'll learn about radio restoration!

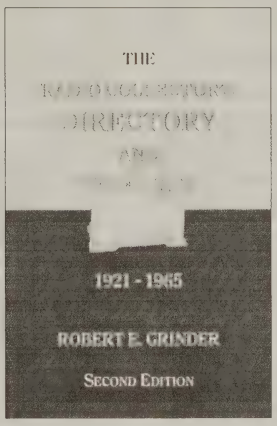
Send $29.95 plus $3.00 S&H to:
Perham Foundation,
101 First Street, Suite 394,
Los Altos, CA 94022

For more information, call us at 408-734-4453

Proceeds support construction of our new museum!

The Radio Collector's Directory and Price Guide, 1921-1965, 2nd Ed.

by Robert E. Grinder



20,000+ Models Listed

One Month Free!

BONUS FOR EARLY RENEWALS

If you renew **before** the month shown on your mailing label (your expiration month), you will receive an extra month on your subscription: 13 months instead of 12! 26 months for an early 2-year renewal!

FOR SALE: Thousands of tested tubes w/warranty! Both xmit and rec tubes. Buy those spare tubes for your tube radio, audio, ham and electronics. Most tubes are used at about 1/3 of new, many are around $1. I have bunches of octal, 7- and 9-pin tubes. All tubes are tested on TV-7D/U tester and then boxed. I give a 30-day warranty. Send wants or SASE with two stamps for list. Daniel Nelson, 1025 E. Desert Ln., Phoenix, AZ 85040. (602) 243-7421, evenings. E-mail: djn@indirect.com

FOR SALE: KLH FM receiver – $10 + post. Grundig Model 88U 3-tube – $15 + post. **WANTED:** AK Type N speaker, 5 prongs. Robert Parke, 504 Essex St., Gloucester City, NJ 08030-1015. (609) 742-8221

FOR SALE: Philco #37-93 cathedral – $140. Philco #39-25 slant front – $100. Fada Bakelite – $55 + UPS. Jim O'Neill, 170 Devon Rd., Delaware, OH 43015. (614) 363-3682

FOR SALE/TRADE: If you are or know of a serious phonograph collector, perhaps this ad will be of interest! I have just acquired a most unique and unusual floor model phonograph decorated in Egyptian motif and shaped to resemble a pyramid. This unit is surrounded with over (100) hieroglyphic cutouts, tastefully hand-painted Pharaohs and king figures plus Egyptian scenery. Mfg. by Pyramida Inc., circa 1920. It's absolutely breath-taking if you appreciate fine design or something different. For details, or a videotape and information, call. I can ship it anywhere in the world, including Egypt. Larry Drago, 383 Lincoln Dr., Cheshire, CT 06410. (203) 272-6030

FOR SALE: Bakelites: Radiola 510A, Sonora RBU-176, Airline 64BR-15048, Emerson 560A, Airline 84 GWM-1058A – $30 ea. Mark Thornquist, 45 Second St., Glens Falls, NY 12801. (518) 761-4143

FOR SALE: Two Zenith 9S262 black shutter dial consoles, complete and play – $350/both or $225 ea. John Koop, 48 Wheelbarrow Ln. Wantagh, NY 11793. (516) 731-6711

FOR SALE: Catalogs: 1959 Marconi Instruments – $40. 1947 Ferris Instrument – $30. 1954 Allied Radio – $25. A.G. Tannenbaum, PO Box 386, Ambler, PA 19002. (215) 540-8055

FOR SALE: Sams sets starting #1, complete your collection, will trade. SASE w/wants or list. Gary A. Micanek, 226 Henry Ave., Manchester, MO 63011. (314) 227-7046

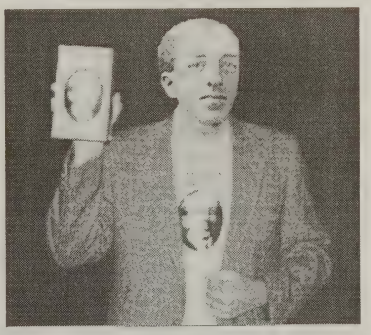
"Do you know me?

I started the world's first broadcasting station. I'm Charles Herrold, and between 1912 and 1917 I was sending music and news to an audience in San Jose, California, on a regular schedule. But while I may have been first, most people forgot all about me. Now there's hope; my story is told in this exciting new videotape from the creator of the award-winning PBS series 'Radio Collector.' It's available from the Perham Foundation. Don't leave home without it!"



"Broadcasting's Forgotten Father: The Charles Herrold Story"

VHS-Hi-Fi, close-captioned, $29.95 plus $3.50 S&H.
Order directly from the Perham Foundation,
101 First St., Suite 394, Los Altos, CA 94022.
Or call 408-734-4453 and use your credit card.
All profits go to support the preservation of electronics history.

WANTED: Your input! Arcturus is considering starting a phone technical service. The customer can access our technical library with a phone call within specified hours, most like 8-10 hours per week initially. Information available will consist of vacuum tube parameters and general info (pinout, specs, substitutes, etc.), vacuum tube equipment repair, Sams and Riders information, TV technical info/advice, radio repair info/advice, and help on electronic parts sources worldwide. This will not be a 1-900 line, but a billed service. We would appreciate your thoughts on the feasibility of this service as we realize how difficult it is to have access to technical information. Please fax, phone or mail your thoughts to: Arcturus, 3554 W. 105 St., Cleveland, OH 44111. Ph./fax: (216) 647-3908

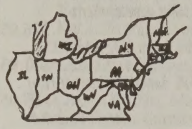
Vintage TV's and radios

HARRY POSTER

Stereo 3D & quality cameras

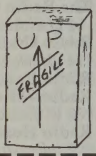
P.O. Box 1883 S. Hack., NJ 07606 hposter@worldnet.att.net 24 Hr Phone: 201.794.9606 24 Hr FAX: 201.794.9553



WE DELIVER (and Pick-up too!) From New England to Virginia and up to Chicago, we can pick-up your transistor radio or console TVs...and treat them like a full-time collector would...not like a part-time moving company's helper does! Why get it broken or wait months for the next radio meet?

Selling? Keep your customers' orders intact!

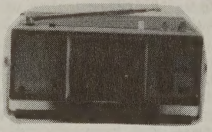
Buying? Protect your purchases! Rates from $65 up.



WE BUILD *WOODEN* CRATES! We can box and ship your Catalin radio or your Scott console...and we can build a plywood and lumber crate to get it there. Just need the crate--even a reusable one? We'll build and ship it empty, and you can fill it and ship it or store it. Makes shipping fragile items much safer! Most crates from $65-$175

***please* CUT AND SAVE this ad!**

FOR SALE: Crown CTV-12



1968 mini TV with 5" CRT is only 10" wide by 4" high. Works but the picture has shrunk to 1" high. Nice grey and chrome set, missing the vertical knob, but you might be able to replace it with a typical clock-radio knob. **Crown TV...$64**

FOR SALE: Candle MT-510. Micro Transistor TV from Japan, about 8" wide x 5" high with bunny ears built into the handle. It's grey and chrome. We do not have the power cord, but it looks like the square Sony cord. For AC or car battery. **Candle..$55**

FOR SALE: Armstrong J5

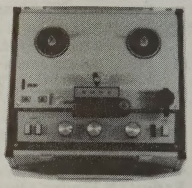
1932 aerial eliminator is in a glass tube with bakelite base. Put this in your battery set for better performance and it fits right in! 5" high with orange and black label. A very unusual item! **$38**

FOR SALE: Russian Transistor Radio Kit. New, in original package with all parts! A complete 4-transistor radio kit (***4 ТРАНЗИСТОРА***), you even wind the coils). Instructions in Russian, but you can use the pictorial and schematic to assemble this. One marked ***ЮНОСМЪ*** ...$89

Another, front has CB and 520-1800 khz, marked ***ЮНОСТЪ КП101*** ...$101

FOR SALE: US-made Transistor Kits. These are a few new, packaged kits from a school project--I think from the 1970s. I have 2 power supplies, an audio amp, and a computer circuit with a Fairchild μ1914. We just want to sell the lot so they're cheap! **4 kits, new...$24**

FOR SALE: Sony TC-200 w/tube amp. At nearly 30 lbs, this Stereo Tapecorder is a quality unit with 2 VU meters. Takes 7" reels, with 2 speeds, 2 mikes and 2 remote speakers. Motor works and I did get some audio. **1965 Sony...$72**

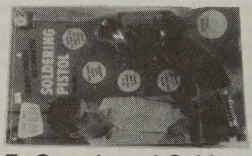


FOR SALE: RCA 1YB29A hi-fi sound tape cartridge style tape recorder--the DeLuxe version with tuning eye. RCA tried this system before 8-tracks became the standard. Works (the last guy just put in new belts), **w/6 tapes $61**

Cartridges, for RCA players. **5 tapes...$15**

FOR SALE: VM Courier Model 729. Marked "Add-a-Track". The motor and fan in this tube-type tape recorder spin, but it needs a new belt. This is a nice quality tape recorder. **Courier...$29**

FOR SALE: Waterman Pocketscope S-10-A. This 2" scope is less than 4" wide and less than 10" long! Great unit to use or display. Working condition. **2" scope $48**



FOR SALE: Gun-shaped Solderer. Maybe a NRA special??? Looks like a pistol, but it's actually a brown bakelite 100 watt soldering gun! **New, packaged WEN Model 75 gun...$29**

CLASSIFIED ADVERTISING POLICY

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 25¢ each. See details below. Classified ads sent by mail, fax or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Stamps or cash are OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on page 2 for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on the inside front cover.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O , o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. See inside front cover for additional information.

CLASSIFIED AD DETAILS

Deadline: NOON ET– 10th of the month!

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, etc. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

To encourage varied content of the ads, the same classified ad may be run only once per issue and for only two consecutive months. (To run an ad longer, use a boxed classified or display ad.)

Classified Ad Rates per Month

Subscribers:

First 20 words: **FREE***
25¢ per word for extra words over 20 **plus**
10¢ per word for a shaded ad (count all words including free words).
* Subscribers may take 20 free words on only **one** ad each month.

Non-Subscribers:

41¢ per word **plus**
10¢ per word for shaded ad.

Please do not forget to send in the extra 25¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

36¢ per word for all words,* none free, **plus**
10¢ per word for each bold word **plus**
10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

45¢ per word for all words* **plus**
10¢ per word for each all-caps word.

Non-Subscribers:

Add 20¢ per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

$20.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The **standard headings**: WANTED, FOR SALE, etc., count as **one word** each time used in an ad. **Name, address** and (one) **telephone number**, count as **6 words**, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.
